#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 04 August 2003.
- 2a) This action is FINAL.                    2b) This action is non-final.

1. This is a first Office action on the merits for application serial number 10/633457 filed 08/04/03. Claims 1-8 are pending.
2. It is unclear if applicant intended to claim priority under 35 USC 119 to PCT/CN02/00076, intended to file the application as a continuation of PCT/CN02/00076 under 35 USC 120, or intended to file a National Stage application under 35 USC 371. As none of the conditions for filing under 35 USC 119, 120 or 371 have been met, this application is being treated as being filed under 35 USC 111.
3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:  
The specification to which the oath or declaration is directed has not been adequately identified. Both the "attached hereto" and "filed on" boxes have been checked. See MPEP § 602.
4. The disclosure is objected to because of the following informalities: reference character "8" has been used to designate both cantilever members and cross pieces.  
Appropriate correction is required.
5. Claims 1-8 are objected to because of the following informalities: reference numerals cannot be used to distinguish claim elements from one another, slide brackets [5] and slide brackets [6] should be differentiated with language rather than reference

numerals, reference numeral [8] is used to designate both cantilever members and cross pieces, and "the four right angled branches" lack antecedent basis . Appropriate correction is required.

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

There is an inadequate written description of the relationships/connections between the center members, side members, cantilever members and slide brackets and how the connected elements collapse. It can be seen from figure 4 that side member 7 and center member 4 can slide relative to one another but it is unclear how they and cantilever members 8 move from an erected position to a collapsed position. The hinged connections are not clearly described or shown in the figures. Claim 2 requires that side member 7 is connected to slide bracket 5 with a hinge connection. Figure 4 appears to show a connection which would not allow hinging.

8. The examiner requests applicant to advise the examiner of the status of the priority application of WO 02/64918, CN 01215189.0.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Canfield whose telephone number is 571-272-6440. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Friedman can be reached on 571-272-6842. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
